**RFP ADDENDUM #1 for RFP 2022-02 & 01**  
Date of Addendum: 07/14/2022

**NOTICE TO ALL POTENTIAL RESPONDENTS**

The Request for Qualifications (RFP) is modified as set forth in this Addendum. RFQ/RFP respondent shall take this Addendum into consideration when preparing and submitting its Proposal. We are requiring a spec for the wire used other than what may come with a piece of hardware to be compatible to the Ford recommended specification ESB-MIL85-A with a temperature rating of -40°F to 257°F. The insulation of this primary automotive wire is very resistant to heat and abrasions that typically causes failure of hardware.

Below see additional spec/manufacture requirements.

There are several manufactures' that offer this wire and it appears to be readily available;

Graphics - 3M 680CR with 8518 over laminate

Graphics are FULLY reflective on entire vehicle.

K9 Insert - Setina CK2393ITU20

911 Circuits - CH27.BP.Unique.500

Wiring harnesses - ADMIN Civilian explorers and Ram 1500 will use regular cross link wire harness built by the upfitter.

**Submission of Proposals**

The material specification for ADDENDUM is not typically itemized and generally shown as "miscellaneous shop supplies". It will be at the vendors discretion as to how it is shown, however it remains a specification and verifiable requirement at time of inspection.

**Clarification on Evaluation Criteria**

The evaluation points available for each criterion of the sections for the proposals have not changed

**END OF ADDENDUM**
